🎉 **Unomito Variant.** Follow the classic Unomito rules, but with **only one hidden pile!** It is initialized with a **exceptionally face-up card** (the reference), even though players play their cards face-down on top of it.

🎲 **Turn of Play.** On your turn, **announce the number and color** of the card you are playing (e.g., 9 red, 10 green, etc.; **you can of course bluff** 😉, but it must match the reference). What you announce becomes the new reference for the next player.

😨 **Liar.** As in classic Unomito, to challenge, a player flips over the card that was just played. This card then becomes the **new reference** (and stays face-up). Players continue by playing face-down cards.
